Subject: Bayou Corne Natural Gas Seep-Activities conducted on Saturday, September 1, 2012 between 0800 hrs to 2000 hrs
Date: 09/01/2012 11:04 PM

- 24/7 air monitoring/oversight was conducted at the drilling site. Duties included review of facility's real-time monitoring data with the facility/contractor personnel, review of alarm readings and also calibration and maintenance records for facility's air monitoring instruments, and hand-held air monitoring at 9 monitoring points. Parameters monitored included CO, H₂S, VOCs, LEL, and O₂. All readings were below the low action levels and with normal O₂ readings. All hand-held air monitoring was conducted using a MultiRae. EPA START completed a total of 6 rounds of hand-held air monitoring at the 9 monitoring points.
- Activities at the site have resumed after the passage of Hurricane Isaac. There was no damage at the site from the hurricane.
- State Police have not set up their command trailer at the site after the hurricane.
